

PRASHA SHRESTHA

shr.prasha@gmail.com ♦ (205) · 948 · 7087

EDUCATION

- Ph.D. in Computer Science, University of Houston** Jan 2015 – May 2018
Advisor: Dr. Thamar Solorio, GPA: 4.00
Dissertation Title: Authorship Attribution in Realistic Scenarios
- MS in Computer Science, University of Alabama at Birmingham** Aug 2012 – Dec 2014
Advisor: Dr. Thamar Solorio, GPA: 4.00
- BE Computer Engineering, Tribhuvan University Institute of Engineering** Nov 2005 – May 2010
Final Year Project: Nepali Text to Speech

EXPERIENCE

- Post Doctoral Research Associate, Pacific Northwest National Laboratory** Jun 2018 – Present
- **Virality Forecasting with Graphs**
A node-aware attention model to predict the virality of repositories on GitHub, tweets on Twitter (multitasking to forecast retweets and mentions together), and videos on YouTube using dynamic network graphs with $R^2 > 0.7$.
 - **Information Spread in Online Social Media**
Analysis of information spread about software vulnerabilities and cybersecurity threats on online social media and the possible factors that drive it.
- Research Intern, Pacific Northwest National Laboratory** Feb 2018 – May 2018
Mentor: Dr. Svitlana Volkova
- **Anticipatory Analysis with Deep Learning for Graphs**
Graph embeddings using node2vec and Deepwalk trained on daily network graphs to predict the instability of a country with GDELT data and to predict email exchange volume with ENRON data.
- Research Assistant, University of Houston (RiTUAL Lab)** Jan 2015 – May 2018
- **Cross-domain representation learning**
Using domain-colored tokens to learn embeddings for two vastly different domains (Guardian news and tweets) in the same space, for ~20K documents from 10 authors with 33% accuracy on document level, an improvement of 20% over a bag-of-words baseline.
 - **Authorship attribution of short texts**
Multi-channel CNN model with character n-gram and word sequence inputs for authorship attribution of tweets from 1K users that achieved an accuracy of 38% on tweet level, an improvement of >11% over a character-only baseline.
 - **Large scale authorship attribution and verification**
Authorship attribution via individual verifiers using various lexical and syntactic features for authorship attribution of 1K Amazon reviewers and 500 Yelp reviewers with ~80% accuracy on a user level.
 - **Author profiling on medical forum posts**
Combined age and gender prediction of ~84K users from DailyStrength medical forum users using lexical and familial token based features obtaining 88% and 65% accuracy for age and gender prediction respectively.
- Research Assistant, University of Alabama at Birmingham (CoRAL Lab)** Aug 2012 – Dec 2014
- **Text alignment in plagiarism detection**
Using stopword and named entity n-grams matching for alignment of plagiarized passages. Also used TER-p as a similarity metric for text alignment.
 - **Plagiarist identification**
Identification of the original document by measuring similarity between the plagiarized and non-plagiarized parts of two documents.
 - **Author profiling on social media posts**
Efficient implementation of Naive Bayes with tf-idf using MapReduce for author's age and gender identification of English and Spanish documents.
 - **Malware family identification**
Prototype based classification using prominent string sets of ten malware families.
- Software Engineer, Bajra Technologies Pvt. Ltd.** Aug 2011 – May 2012
- **Web service for mobile applications**
 - **Website development**

- Accounting and inventory management for a hospital management system
- MIS for Carolina Medical Homes

TECHNICAL STRENGTHS

Programming Languages	Python, Java, C++
Tools and Libraries	Keras, scikit-learn, nltk, networkx, pandas, matplotlib
Databases	MongoDB, MySQL, SQLite
Cloud Services	Amazon EMR, EC2, S3

AWARDS

First position in University of Houston CS PhD showcase 2017
 Recipient of Cullen Travel Grant 2017
 Studentship to attend the 2017 European Chapter of the ACL Conference
 Third position in the PAN Author Profiling 2014 Shared Task
 GHC Scholarship Grant to attend the 2014 Grace Hopper Celebration of Women in Computing
 Travel grant to attend the 2014 CRA-Women (CRA-W) Conference
 Freeship and fellowships in 6 out of 8 semesters at Tribhuvan University

TRAINING AND CERTIFICATIONS

MILA Deep Learning and Reinforcement Learning Summer School	<i>Jun 2017</i>
Lisbon Machine Learning School (<i>LxMLS 2016</i>)	<i>Jul 2016</i>
Deep Learning Workshop at <i>MindLab</i> , Universidad Nacional de Colombia	<i>Jan 2016</i>
Machine Learning, www.coursera.org	<i>May 2014</i>
